- User Authentication
- IT Assessment service

### Data Center

- KDDI Cloud Inventory

## Automation solution

- ### Save time & Effort

Eliminate data entry mistakes when transferring data between business systems. Robots can work at any time; they can copy over data from a report received in the evening and have it ready for the next morning.
- ### Working Environment Improvement

Enable staff to focus on creative works by sharing repetitive and uninteresting tasks to RPA robots
- ### Improve customer experience

By using RPA when gathering data, the chance for human error is significantly reduced, thereby improving customer satisfaction.
- ### Global support

With operations globally, KDDI offers provide smooth implementation support for RPA projects.

## Zero trust solution

- ### Combine your closed network with Internet access for a solution that is optimal for your organization.
- ### Limit the operational burden related to WAN router management and reduce network circuit costs.
- ### comfortably use high-bandwidth applications (such as video) and cloud-based applications.
- ### your company's security measures as you proceed with implementing new-normal work styles.

## Global Datacenter

- ### Where the world's data traffic meets

Home to the London Internet Exchange (LINX) and a diverse
- ### A safe home for your data

Full CCTV surveillance, 360° monitored perimeter fencing and dedicated on-site security personnel
- ### Support and access day or night

Call on our expert support desk or visit our convenient facilities 24/7, 365 days a year.
- ### Connect to your cloud services

Direct, resilient links to Microsoft Azure ExpressRoute and Amazon Web Services Direct Connect.
